A Clear Buying Process

Registering your requirements lets us match you to the right opportunities quickly and confidentially. Our process is designed to be straightforward and discreet.

Sourcing to Delivery

◆ Independent sourcing

We work to your brief — spirit type, age, volume, budget and market — and source suitable stock from across our network.

◆ Confidential opportunities

Many of the best opportunities are never advertised. Registered buyers gain access to discreet and off-market stock.

◆ Due diligence

We verify provenance, documentation, bond status and condition so you can proceed with confidence.

◆ Quality assurance

We focus on well-provenanced, correctly documented stock, helping you avoid the pitfalls of an unregulated secondary market.

◆ Transaction management

We handle the commercial, operational and logistical detail, including bonded transfers, through a single point of contact.

◆ Export & bottling coordination

Where required, we coordinate export logistics and end-to-end bottling — sourcing, packaging, labelling, compliance and delivery to your market.

◆ Long-term sourcing relationships

For repeat and programme buyers, we build ongoing sourcing relationships aligned to your commercial pipeline.
