

HOW WE WORK

From cask to customer.

A single, managed process — confidential at every stage, with one point of contact from first conversation to final delivery.

Understand

We start with your objective — what you hold or need, and what a good outcome looks like.

1

Assess & Value

Independent valuation of the stock: volume, spirit type, age, cask, bond and route to market.

2

Structure

We build the commercial solution — the deal, the buyers or the stock, and the terms.

3

Source or Match

We source the whiskey, or match your stock to the right buyer in our network.

4

Bottle & Package

Where a finished product is needed, we coordinate bottling, packaging and compliance.

5

Move & Export

We manage bonded logistics and export to the destination market.

6

Deliver

The product reaches the customer. The transaction completes and settles.

7
